

# Used Cars Project Proposal

---

## Question/need:

- How price of cars is effected by the fuel
- How price is related to different kinds of manufacturers
- What is the common color for used car
- How can we predict used car price

## Data Description:

- Used Cars Dataset. It is obtained from Kaggle
- The data is scraped every few months, it contains most all relevant information that Craigslist provides on car sales including columns like price, condition, manufacturer, latitude/longitude, and 18 other categories.

## Tools:

- **Technologies:** Python using Jupyter notebook , Linear Regression .
- **Libraries:** Scikit -learn for modeling ,Pandas, Matplotlib and Seaborn.
